WASTEWATER TREATMENT SYSTEMS SPECIALISTS

WASTEWATER REUSE

A REALITY WITH OUR SYSTEMS

- Our systems are designed to give an effluent of excellent quality, which ensures the possibility of reuse of treated wastewater.
 - This quality ensures the effectiveness of the disinfection systems and guarantees the safety of the users.
- ✓ EXCELLENT QUALITY
 - ✓ FREE OF ODORS
 - ✓ ACCORDING TO THE REGULATIONS
 - ✓ SCENIC BEAUTY
 - ✓ IMPORTANT SAVING OF WATER FROM OTHER SOURCES

EXPERIENCE

Most of our clients in coastal areas, reuse their wastewater in irrigation that represents around **40 millions of liters per day**

OUR CUSTOMERS WHO HAVE CHOSEN TO TAKE ADVANTAGE OF TREATED WASTEWATER, HAVE EXPERIENCED AN IMPROVEMENT IN THE MAINTENANCE CONDITIONS OF THEIR GREEN AREAS. GIVEN THE HIGH NUTRIENT CONTENT, THERE IS A SAVING IN THE USE OF FERTILIZERS, EVEN IN AREAS AS SENSITIVE AS GOLF COURSES.

IN CASES WHERE THE WASTEWATER IS DIRECTED TOWARDS LAGOONS, THIS ALLOWS A CONSTANT FLOW TO BE MAINTAINED DURING THE DRY SEASON AVOIDING THE INCONVENIENCES OF MAINTAINING STAGNANT WATER. THIS PRACTICE ALSO BECOMES A STRONG POINT DURING ENVIRONMENTAL CERTIFICATION PROCESSES AND IT IS WELL REGARDED BY LOCAL AUTHORITIES.
